CFS Market Advantage

Goal

- Take the emotion out of making that first commitment to sell grain and provide a benchmark
- To price your grain at a level that is better than the October harvest average.

How it works

- Sign up runs until 1/31/2019. Contact your GPPS advisor.
- Once the pricing period ends, the contract price is determined and turns into a Futures First Contract
- Bushels are priced according to GPPS recommendations and market trends until 6/15/19 on old crop, New crop pricing until 8/15/19.
You determine delivery date. Contract can go to any approved location.

CFS Marketing Advantage

- Pricing occurs as the market is trending higher.
- You have control over delivery points, securing basis improvement, attaching call options, and capturing carries in the market,
- Gives you the freedom to concentrate on other areas of your operation.

Contract Terms and Conditions: Must be sold in 1,000 bushel increments. (i.e. must be 7,000 or 8,000 bushels, not 7,500 bushels). All contracts will convert to a cash contract.

Fees: 7 cents per bushel for old crop
10 cents per bushel for new crop
